Nguyen Viet Anh

Fullstack Developer

0325174809 vietanh20030914@gmail.com Dong Da, Ha Noi

CAREER OBJECTIVE

Fullstack Developer with 3 years of experience in PHP (Laravel, Yii2), Node.js (NestJS), VueJS, and MySQL. Experienced in building e-learning, e-commerce, and affiliate platforms, developing RESTful APIs, optimizing database performance, managing Linux servers, and delivering scalable web applications. Seeking opportunities to further develop backend architecture and system optimization skills while contributing to business growth.

EDUCATION

FPT Aptech 2021 - 2023

Major: Software engineering

WORK EXPERIENCE

MKT Solutions JSC 06/2023 - 01/2024

Fullstack Developer

Participated in the development and maintenance of e-commerce and affiliate marketing platforms. Worked closely with frontend and business teams to build scalable web applications, optimize database performance, and improve user experience. Experienced in developing RESTful APIs, integrating payment gateways, implementing Redis caching, and deploying applications on Linux servers.

Unica JSC 02/2024 - Present

Fullstack Developer

Designed, developed and maintained e-learning and affiliate platforms serving thousands of users. Participated in backend API development, database optimization, payment integration, examination systems, affiliate tracking, and community platforms. Experienced in performance tuning, Redis caching, Linux server management, and maintaining high-availability production systems.

SKILLS

PHP, Laravel, Yii2, Node.js (NestJS)	Backend development, RESTful APIs, system architecture
VueJS, NuxtJS, JavaScript, TypeScript	Building responsive user interfaces and SPA applications
MySQL, MongoDB, Redis	Database design, optimization, caching and session management
RabbitMQ	Message queues, asynchronous processing, background job handling
Docker, Git, Linux, Nginx, CI/CD	Deployment, server management, monitoring and version control
RESTful API, WebSocket	API development and real-time communication
Performance Optimization	Database tuning, query optimization, Redis caching and application performance improvement

PROJECTS

VShop 06/2023 - 11/2023

Developer

Description: A multi-vendor e-commerce platform allowing merchants to manage products, orders, promotions, inventory, and customer information.

My responsibilities:

- Developed Product, Category, Cart and Order modules.
- Built RESTful APIs for frontend and mobile applications.
- Optimized MySQL queries and API performance.
- Implemented Redis caching for product listings and homepage data.

Team size: 6

Technologies: Laravel, VueJS, MySQL, Redis, Docker

MKT Affiliate Hub 09/2023 - 01/2024

Developer

Description: An affiliate marketing platform for campaign tracking, commission calculation, and performance reporting.

My responsibilities:

- Developed affiliate tracking and reporting features.
- Built APIs for conversion and commission management.
- Optimized reporting performance with Redis.
- Implemented RabbitMQ for background jobs and notifications.
- Maintained and enhanced system functionalities.

Team size: 5

Technologies: Laravel, MySQL, Redis, RabbitMQ, Docker

Unica

2/2024 - Present

Developer

Description: Developed and maintained an e-learning system, building RESTful APIs for course and user management, integrating frontend-backend interactions, and optimizing performance with MySQL.

My responsibilities:

- Developed and maintained LMS modules and RESTful APIs.
- Built course, lesson and learning progress features.
- Optimized database performance and application response time.
- Maintained and enhanced existing functionalities.

Team size: 4

Technologies: PHP, Yii2, MySQL, HTML, CSS, jQuery, Ajax.

Domain: https://unica.vn

Edubit

8/2024 - 12/2024

Developer

Description: Building a scalable course-selling platform for instructors, including course management, payments, and content delivery.

My responsibilities:

- Developed examination and question bank modules.
- Built APIs for course and student management.
- Enhanced user experience and learning workflows.

Team size: 6

Technologies: PHP, XTemplate, MongoDB, HTML, CSS, jQuery, Ajax.

Domain: https://edubit.vn

Edubit Me

8/2024 - 4/2025

Developer (API & Game Client)

Description: Participated in game development, building backend APIs with NestJS, handling game logic and user data, implementing realtime features with WebSocket, and developing player interfaces.

My responsibilities:

- Developed backend APIs using NestJS.
- Implemented real-time features with WebSocket.

- Built game-related business logic and user management.
- Maintained and optimized system performance.

Team size: 5

Technologies: NestJS, WebSocket, JavaScript/TypeScript, HTML, CSS, MongoDB.

Domain: https://edubit.me

Unica expert

6/2024 - 10/2024

Developer

Description: A learning community platform integrated with affiliate marketing, enabling users to join existing communities or create and manage their own.

My responsibilities:

- Developed community and affiliate-related features.
- Built and maintained RESTful APIs using NestJS.
- Implemented Redis caching to improve performance.

Team size: 6

Technologies: Vue js, NestJS, REST API, Redis, MongoDB

Domain: https://unica.expert

ID QUIZ

6/2025 - Present

Developer

Description: An online learning platform for high school education and exam preparation.

My responsibilities:

- Developed quiz and examination modules.
- Designed and optimized database structures.
- Implemented Redis and RabbitMQ for exam processing.
- Maintained and enhanced reporting features.

Team size: 3

Technologies: Laravel, MySQL, Redis, RabbitMQ, Docker

Domain: https://idquiz.vn

Affiliate Unica

10/2025 - Present

Developer

Description: Developed an affiliate system for order management (Network–Manager–Affiliate–Advertiser), built RESTful APIs with NestJS for processing and reporting, and implemented admin dashboards using VueJS.

My responsibilities:

- Developed affiliate management features and APIs.
- Built commission and conversion tracking modules.
- Optimized reporting performance with Redis and RabbitMQ.

Team size: 4

Technologies: NestJS, VueJS, MySQL, Redis, RabbitMQ

Domain: https://affiliate.unica.vn

INTERESTS

Football, badminton, gaming
